

PROFESSIONAL SUMMARY

Analytical and detail-oriented **Data Science & AI** student with a strong mathematical, statistical, and programming foundation. Skilled in **Python, R, SQL, Machine Learning, and Time Series Forecasting**. Demonstrates practical exposure to quantitative research and business intelligence visualization through hands-on simulations with Tata and J.P. Morgan. Eager to leverage data mining, statistical modeling, and relational database management skills to drive data-driven insights as an entry-level Data Scientist or Data Analyst.

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, Java, C

Data Analysis & Statistics: Time Series Analysis & Forecasting, Statistical Inferencing, Basic Econometrics, Exploratory Data Analysis (EDA), Optimization, Signals & Systems

Machine Learning & AI: Machine Learning Fundamentals, Data Mining & Warehousing, Algorithm Design & Analysis, AI Concepts

Databases & Tools: Relational Database Management Systems (RDBMS), Data Visualization, Computer System Tools

EDUCATION

B.Sc. (Hons) in Data Science & Artificial Intelligence — *Indian Institute of Technology Guwahati*
Expected Graduation: [August, 2028]

- **Data & Programming:** Python Programming, Intro to R, C Programming, Java Programming, Data-Structures, Relational Database Management Systems (RDBMS).
- **Analytics & ML:** Machine Learning Fundamentals, Time Series Analysis & Forecasting, Data Mining & Warehousing, Optimization, Algorithm Design & Analysis.
- **Mathematics & Statistics:** Introduction to Statistics, Statistical Inferencing, Basic Econometrics, Signals and Systems.

PRACTICAL EXPERIENCE & VIRTUAL SIMULATIONS

Quantitative Research Job Simulation — *J.P. Morgan (via Forage)*

- Applied quantitative research methods and mathematical modeling techniques to analyze data structures and financial datasets.
- Synthesized statistical findings into actionable metrics to support data-informed strategy and decision-making.

Data Visualisation: Empowering Business with Effective Insights — *Tata (via Forage)*

- Designed clear, visually effective dashboards and charts tailored to communicate key performance indicators (KPIs) to business leaders.
- Evaluated complex data needs to prepare strategic analysis and visual summaries for executive-level decision-makers.

CERTIFICATIONS

- **DA 261:** Machine Learning Fundamentals
- **DA 210:** Time Series Analysis & Forecasting (Cohort 1)
- **Data Visualisation Job Simulation:** Tata (Forage)
- **Quantitative Research Job Simulation:** J.P. Morgan (Forage)

ACADEMIC PROJECTS

Time Series Analysis & Predictive Modeling

- Applied statistical models and time series forecasting techniques in Python/R to analyze sequential data trends and project future outcomes.

Database Design & SQL Data Mining

- Structured relational database schemes (RDBMS) and executed complex SQL queries to extract, clean, and analyze structured datasets.
